

v8::internal::MacroAssembler
::Debug

v8::internal::Assembler
::Unreachable

v8::internal::Assembler
::debug

```
graph LR; A[v8::internal::MacroAssembler::Debug] --> C[v8::internal::Assembler::debug]; B[v8::internal::Assembler::Unreachable] --> C;
```

The diagram illustrates a relationship between three V8 internal classes. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::MacroAssembler::Debug'. The bottom box contains the text 'v8::internal::Assembler::Unreachable'. On the right, there is a gray rectangular box containing the text 'v8::internal::Assembler::debug'. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that both 'v8::internal::MacroAssembler::Debug' and 'v8::internal::Assembler::Unreachable' inherit from or are related to 'v8::internal::Assembler::debug'.
