

v8::internal::compiler  
::GraphAssembler::start

```
graph LR; A["v8::internal::compiler  
::GraphAssembler::start"] --> B["graph"]
```

A diagram showing a call from the `v8::internal::compiler::GraphAssembler::start` function to a `graph` object. The source function is in a grey box on the left, and the target object is in a white box on the right, connected by a blue arrow.
