

v8::internal::CpuProfiler
::StopProfiling

v8::internal::CpuProfiler
::~~CpuProfiler

v8::internal::CpuProfiler
::DisableLogging

```
graph LR; A[v8::internal::CpuProfiler::StopProfiling] --> D[v8::internal::CpuProfiler::DisableLogging]; B[v8::internal::CpuProfiler::~~CpuProfiler] --> D;
```

The diagram illustrates two separate calls to methods of the `v8::internal::CpuProfiler` class. The first call, `StopProfiling`, originates from the top-left box. The second call, `::~CpuProfiler`, originates from the bottom-left box. Both arrows point to a single target box on the right, which represents the `DisableLogging` method. The target box is shaded gray, while the source boxes are white.
