

v8::internal::wasm
::WasmInterpreterThread
::GetCurrentActivationFor

```
graph LR; A["v8::internal::wasm  
::WasmInterpreterThread  
::GetCurrentActivationFor"] --> B["v8::internal::wasm  
::WasmInterpreter::GetWasm  
Runtime"]
```

A diagram showing a call from a thread to a runtime. On the left, a gray box contains the text 'v8::internal::wasm', '::WasmInterpreterThread', and '::GetCurrentActivationFor'. A blue arrow points from this box to a white box on the right. The white box contains the text 'v8::internal::wasm', '::WasmInterpreter::GetWasm', and 'Runtime'.
