

v8::internal::StringForwarding  
Table::Block::Block

v8::internal::StringForwarding  
Table::Record::set\_raw\_hash  
\_if\_empty

v8::internal::StringForwarding  
Table::unused\_element

```
graph LR; A["v8::internal::StringForwarding  
Table::Block::Block"] --> C["v8::internal::StringForwarding  
Table::unused_element"]; B["v8::internal::StringForwarding  
Table::Record::set_raw_hash  
_if_empty"] --> C;
```

The diagram illustrates a mapping or forwarding mechanism. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'v8::internal::StringForwarding Table::Block::Block'. The bottom box contains the text 'v8::internal::StringForwarding Table::Record::set\_raw\_hash \_if\_empty'. On the right, there is a single gray rectangular box with a black border containing the text 'v8::internal::StringForwarding Table::unused\_element'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating a mapping from the left-hand identifiers to the right-hand identifier.
