The diagram illustrates a mapping from three V8 internal functions to a single target function. On the left, three white rectangular boxes are stacked vertically. Each box contains the name of a V8 internal function. Blue arrows originate from the right side of each of these three boxes and point towards a single gray rectangular box on the right. This gray box contains the name of the target function. The arrows indicate that the three functions on the left are being redirected or mapped to the single function on the right.
