

v8::internal::compiler
::InstructionSelector
::EmitWithContinuation

```
graph LR; A["v8::internal::compiler  
::InstructionSelector  
::EmitWithContinuation"] --> B["v8::internal::compiler  
::FlagsContinuation::Encode"]
```

A diagram showing a call from the `v8::internal::compiler::InstructionSelector::EmitWithContinuation` method to the `v8::internal::compiler::FlagsContinuation::Encode` method. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source box to the target box.
