

v8::internal::wasm  
::TurboshaftGraphBuildingInterface  
::BlockPhis::BlockPhis

```
graph LR; A["v8::internal::wasm  
::TurboshaftGraphBuildingInterface  
::BlockPhis::BlockPhis"] --> B["v8::internal::wasm  
::WasmDecoder::local_types"]
```

A diagram showing a call from a function in the v8::internal::wasm namespace to a function in the v8::internal::wasm namespace. The left box contains the text 'v8::internal::wasm', '::TurboshaftGraphBuildingInterface', and '::BlockPhis::BlockPhis'. A blue arrow points from the right side of this box to the right box. The right box contains the text 'v8::internal::wasm' and '::WasmDecoder::local\_types'.
