

constexpr

```
classDiagram
    class constexpr {
    }
    class "v8::internal::compiler::turbohaft::detail::TypeForBits< 32 >" {
    }
    constexpr "1" *-- "1" "v8::internal::compiler::turbohaft::detail::TypeForBits< 32 >" : +nan
```

The diagram shows a class named 'constexpr' at the top, which is divided into three horizontal sections. The top section contains the text 'constexpr'. Below it is a composition relationship line with an open diamond at the bottom. To the right of the line is the text '+nan'. This line connects to a larger class box at the bottom. The top section of this box contains the text 'v8::internal::compiler::turbohaft::detail::TypeForBits< 32 >', and the box is divided into three horizontal sections.

+nan

v8::internal::compiler
::turbohaft::detail::
TypeForBits< 32 >
