Variable

v8::internal::baseline
::BaselineAssembler::LoadFixed
ArrayElement

```
graph LR; A["v8::internal::baseline::BaselineAssembler::LdaModule Variable"] --> C["v8::internal::baseline::BaselineAssembler::LoadFixed ArrayElement"]; B["v8::internal::baseline::BaselineAssembler::StaModule Variable"] --> C;
```

The diagram illustrates a data flow or dependency. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::baseline::BaselineAssembler::LdaModule Variable'. The bottom box contains the text 'v8::internal::baseline::BaselineAssembler::StaModule Variable'. On the right, there is a gray rectangular box containing the text 'v8::internal::baseline::BaselineAssembler::LoadFixed ArrayElement'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both the 'LdaModule Variable' and the 'StaModule Variable' are inputs or dependencies for the 'LoadFixed ArrayElement'.
