```

The diagram illustrates a code transformation or inlining process. On the left, three separate function calls are listed in white boxes with black borders. Arrows from each of these boxes point to a single, larger gray box on the right, which represents the consolidated function call. The arrows originate from the bottom-right corner of the first box, the right side of the second box, and the top-right corner of the third box, all converging on the left side of the target box.
