

v8::internal::ArrayBuffer
Sweeper::Detach

v8::internal::ArrayBuffer
Sweeper::Resize

v8::internal::ArrayBuffer
Sweeper::UpdateApproximateBytes

```
graph LR; A[v8::internal::ArrayBuffer Sweeper::Detach] --> C[v8::internal::ArrayBuffer Sweeper::UpdateApproximateBytes]; B[v8::internal::ArrayBuffer Sweeper::Resize] --> C;
```

The diagram illustrates a relationship between three V8 JavaScript engine functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::ArrayBuffer Sweeper::Detach' (top) and 'v8::internal::ArrayBuffer Sweeper::Resize' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::ArrayBuffer Sweeper::UpdateApproximateBytes'. Two blue arrows point from the source functions to the target function, indicating that both 'Detach' and 'Resize' call or depend on 'UpdateApproximateBytes'.
