

v8::internal::Instruction  
::RdMode

v8::internal::Instruction  
::RnMode

v8::internal::Instruction  
::IsAddSubExtended

```
graph LR; A[v8::internal::Instruction::RdMode] --> C[v8::internal::Instruction::IsAddSubExtended]; B[v8::internal::Instruction::RnMode] --> C;
```

The diagram illustrates a relationship between three V8 instruction modes. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::Instruction::RdMode' and the bottom box contains 'v8::internal::Instruction::RnMode'. On the right, there is a gray rectangular box containing the text 'v8::internal::Instruction::IsAddSubExtended'. Two blue arrows point from the right side of the left boxes to the left side of the gray box, indicating that both 'RdMode' and 'RnMode' are specialized or related to the 'IsAddSubExtended' mode.
