

v8::internal::torque  
::TypeVisitor::ComputeType

```
graph LR; A["v8::internal::torque  
::TypeVisitor::ComputeType"] --> B["v8::internal::torque  
::Declarations::TryLookupType"]
```

A diagram showing a call from the `ComputeType` method of the `v8::internal::torque::TypeVisitor` class to the `TryLookupType` method of the `v8::internal::torque::Declarations` class. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source box to the target box.
