

v8::internal::torque  
::cpp::File::BeginIncludeGuard

```
graph LR; A["v8::internal::torque  
::cpp::File::BeginIncludeGuard"] --> B["v8::internal::torque  
::cpp::File::s"]
```

A diagram showing a call from the function `BeginIncludeGuard` to the variable `s`. The left box is shaded gray and contains the text `v8::internal::torque` and `::cpp::File::BeginIncludeGuard`. A blue arrow points from the right side of this box to the left side of the right box. The right box is white and contains the text `v8::internal::torque` and `::cpp::File::s`.
