

std::false_type

```
classDiagram
    class std_false_type["std::false_type"]
    class cppgc_internal_IsGarbageCollectedWithMixinType["cppgc::internal::IsGarbageCollectedWithMixinType< T, bool >"]
    cppgc_internal_IsGarbageCollectedWithMixinType --|> std_false_type
```

The diagram illustrates an inheritance relationship. At the bottom is a class box for `cppgc::internal::IsGarbageCollectedWithMixinType` with two empty slots below the name. Above it is a class box for `std::false_type` with two empty slots below the name. A blue arrow with an open triangular head points from the top of the bottom box to the bottom of the top box, indicating that `cppgc::internal::IsGarbageCollectedWithMixinType` inherits from `std::false_type`.

cppgc::internal::IsGarbage
CollectedWithMixinType
< T, bool >
