```
v8::internal::ProfileData
           FromFile
    # hash
    # block hints by id
    + hash()
    + GetHint()
    + TryRead()
v8::internal::anonymous
namespace { profile-data
```

-reader.cc}::ProfileDataFromFile Internal

 hash has value + hash has value() + set hash() + AddHintToBlock()
